12 MAR 1922

REC'D

ANS'D

1 Enclosure.

Dear Sir,

I beg to enclose herewith application for reclassification survey of the Motor Vessel "LIZZIE AND ANNIE". The Owner's Representative called in this office and explained that at the present time the load line certificate is issued by this Society but that they are desirous of obtaining a class for the vessel and propose to submit her for reclassification shortly.

This vessel does not appear in the Register Book but it is stated that at one time she was classed with the Society, and if the application for classification is favourably entertained we will be pleased if you will forward any documents you may have for us to deal with the case. This vessel was built in 1877, but since then has had the motor installed and has undergone condition surveys for freeboard.

I am, Dear Sir,

Yours faithfully,

Henry Gibbs

The Secretary,

LONDON. E. C. 3.

I Enclosure

Dear Sir,

I beg to enclose herewith application for
reclassification survey of the Motor Vessel "ALIXIA" and
the same's Representative called in this
office and explained that at the present time the load
line certificate is issued by this Society but that they
are desirous of obtaining a certificate for the vessel and
propose to submit her for reclassification shortly.
This vessel does not appear in the Register Book
but it is stated that at one time she was classed with the
Society, and if the application for reclassification is
favorably considered we will be pleased to reclass her with
us and forward any documents you may have in connection with
the case. This vessel was built in 1877, but since
then has had the motor installed and has undergone
condition survey for fresh water.

Referred to the Chief Surveyor
and one Chief Engineer Surveyor.
