

Clip M
m. v. "LIZZIE & ANNIE".

The Surveyors at Hull state that Engine No. 2114/6934 built in February 1932 by Messrs. Svenska Maskinverken, Sodertalje, is to be fitted in this vessel early next month, and enquire whether they will be in order in reporting on the engine and if a notation of LMC with date may be assigned.

There is no note in this Office of this engine having been constructed under the inspection of the Society's Surveyors at Stockholm.

IT IS SUBMITTED the Surveyors at Hull be informed accordingly and be advised that provided the working parts of the engine be opened out and be found in good condition and in accordance with the Rules, and the sizes of the shafting be such as could be accepted, a notation of LMC with date, (without the distinguishing mark *) could be recommended; if it be ascertained from Stockholm that the engine has not been built under special survey.
