nements
agreed

Action was deferred on the 25th August and 16th October pending definite arrangements regarding the drydocking.

proposal

The Hull Surveyors now state that the ship is in drydock at that port and that the major part of the Special Survey has been held, including the drilling of the shell plating. The Screwshaft Survey is to be held at the present time, together with some local repairs to the shell plating. The Surveyors submit for the favourable consideration of the Committee a proposal to defer completion of the Special Survey of the hull and machinery until September, 1960 (12 months after due date). It is stated that the requirements of a General Examination have been satisfactorily complied with for postponement of the Special Survey, in accordance with the vessel's age.
