

S. S. "BAKU STANDARD".

The Owners called at this office today and presented a telegram from the Admiralty asking them to arrange to dry dock the vessel for examination. They state that she will be docked tomorrow in the Tyne and that the Boilers will be opened up for cleaning. They add that the vessel is chartered by the Admiralty, and they do not know when they will be in a position to complete the Special Survey, and they have promised to write and explain the situation to the Committee.
