

COPY.

Enclosure.

2nd November, 1904.

Dear Mr. De Rusett,

I send you herewith, as desired, a copy of my letter of the 13th September in reply to yours of the 12th of that month.

In looking over our copies of the approved bulkhead plans, we find that the bulkhead frames on the sketches of some of the bulkheads have been marked jogged. I take it that this has been done in error, and that these frames will be 4" x 4" x 12/20", not jogged, on all the bulkheads as marked on the midship section and on the plan of main bulkheads, and as mutually agreed upon at our meeting on the 25th & 27th August last.

On the plan of the main transverse bulkheads the vertical stiffeners in the side bunkers should be 8" x 3½" x 3½" x 10/20". I mention this because in one instance you have marked the flanges as being 3" only.

Yours faithfully,
