

COPY.

S.

Enclosure.

6th June, 1894.

Gentlemen,

With reference to Mr. Morrison's report No. 30258 on the steamer "MINERAL", I have to request that you will furnish a sketch showing the details of the arrangements now made in connection with the oil fuel system, for the information of the Committee, and at the same time you should show what parts have been disconnected as stated.

You should also say with reference to the accompanying tracing, what action has been taken in regard to the fitting of No. 2 tank for carrying oil fuel, as it was understood this was contemplated. You should amend this sketch to agree with the vessel in the condition in which she now is.

I am, Gentlemen,

Your obedient Servant,

Secretary.

The Surveyors,

Newcastle-on-Tyne.
