

23th August, 1869.

The Surveyors,
GLASGOW.

Gentlemen,

With reference to the correspondence which has taken place in regard to the compensation required in the case of the composite Ship No.5, building by Messrs.Scott & Linton, consequent on the improper position in which the bilge plate is fitted, I transmit to you a letter dated the 25th instant, received from them demurring anew to a compliance with the Committee's requirements in this instance, also some further remarks made by the principal Surveyors respecting the same, confirmatory of the views they have already expressed, and I am to acquaint you that the Committee quite concur therein.

I request you will apprise Messrs.Scott & Linton accordingly as an answer to their communication which you will return to me when done with.

R.G. pro Secty.
