Casella postale No. 2.

LLOYD'S REGISTER  
RECEIVED  
13 JUL 1935  
Ansd.  
LONDON

Reference

B.

Dear Sir,

s.s. "CONTE ROSSO"  
Loeffler Boiler installation.

With reference to our letters of the 7th and 15th and to your reply of the 20th June last we have to inform you that we have now received the definition of the creep limit as used by Messrs. Witkowitz.

The following is the translation of a paragraph in a letter received on the subject from Messrs. Cantieri Riuniti dell'Adriatico:-

" The limiting creep stress is the stress which causes a mean hourly elongation of 0.0015 % of the length of the test piece during the period between the 25th and the 35th test hour, at 475° C. "

The chemical composition of the molybdenum steel used by Messrs. Witkowitz is as follows:-

C %	0.1
Mn %	0.5 - 0.9
P % max	0.035
S % max	0.035
Mo % above	0.4
Cr % above	0.3
Ni %	0.0

Messrs. Cantieri Riuniti dell'Adriatico request the favour of an early reply so as to be able to discuss eventual points raised by you with Messrs. Witkowitz.
