s.s. "CONTE ROSSO".
Loeffler Boiler & Escher Wyss Turbine Installation.

Dear Sirs,

E.

With reference to the call at this Office of your Mr. Wesendanger and Mr. Flatt in regard to the above, I am directed to acquaint you that the evidence they have produced regarding the use of your special pearlitic cast iron for turbine casings has been examined and, as it is regarded as satisfactory, no objection will be taken to the proposal to use this material for the feed pump casing for this installation.

I shall be pleased to receive, in due course, the further information regarding the details of your experiment on this material. The information will be read with interest.

I have to add, in reply to the enquiry made by your representatives, that it will not be a requirement of this Society that spare gear be provided for this installation.

I am, Dear Sirs,

Yours faithfully,

Messrs. Escher Wyss Engineering Works, Ltd.,
52, Grosvenor Gardens,
S.W.1.

Secretary.
