Dear Sirs,

We beg to let you know that the space conditions existing on the steamer "Conte Rosso" require a modification of the arrangement of the branches for the low pressure inlet and outlet of resuperheater drawing N° 2529/H for the Löffler boiler plant. This new arrangement of the branches you will kindly see from enclosed drawings N° 2529/H and 2545/H. The branches it. 4 and 5 are of cast steel. For urgency's sake, we have already finished the resuperheater to enclosed drawing and it is to be inspected before dispatch.

We request you therefore to approve the modifications and to advise your inspector at our works.

Yours faithfully,

THE VÍTKOVICE MINES, STEEL- AND
IRONWORKS CORPORATION.

Enclosure. *sep.*

Dear Sirs,

We beg to let you know that the above
conditions existing on the steamer "Globe Rover" require
a modification of the arrangement of the branches for the
low pressure inlet and outlet of reuperheater drawing
2523/H for the Lutter boiler plant. This new arrangement
of the branches you will kindly see from enclosed drawings
2523/H and 2542/H. The branches 1.4 and 2 are of cast
steel. For urgency's sake, we have already finished the
reuperheater to enclosed drawing and it is to be
inspected before dispatch.

We request you therefore to approve the
modifications and to advise your inspector at our works.

Yours faithfully,

21 DEC 1935

Referred to the Chief Engineer Surveyor
