

"CONTE ROSSO"

Loeffler Boiler & Escher Wyss Turbine Installation.

IT IS SUBMITTED the Trieste Surveyors be informed it is noted from their letter of the 28th ultimo that it is now proposed to fit studs of Chrome Nickel Molybdenum Steel to the manoeuvring valve and that the nuts are to be of mild steel of medium hardness.

It is considered, however, that the nuts also should be made of a special heat resisting steel, for the reasons given in the Secretary's letter of the 6th September to Messrs. Witkowitz Mines, Steel & Iron Works Corporation, a copy of which is in the Trieste Surveyors' possession, and as indicated also in the Secretary's letters to the Firm of the 20th and 24th September.
