

Steamer "JOLLY" now named "DONA LOURDES"

The Special Survey which became due in this case in January 1953, was commenced at Nagasaki in July, 1952, and postponement until the end of the year of grace was agreed to, subject to a satisfactory General Examination, including drydocking, being held in May last.

The vessel was, however, delayed at Marmagoa awaiting port facilities, and a further postponement of General Examination until the vessel's return to Hong Kong was granted.

This examination eventually took place between August and September, as a result of which, postponement of completion of the Special Survey until the end of last month was confirmed.

Since the General Examination, the vessel has been transferred to Phillipine Owners, and on the 23rd ultimo the Balboa Surveyor, with the knowledge of the New York Office, issued a Short Term Load Line Certificate to enable the vessel to proceed to her home port, where it is understood the Special Survey will be completed.
