

'FOZ DO DOURO'

The Philadelphia Surveyors cable to the effect that the vessel has been fitted with twin-screw oil engines, each of 690 B.H.P. at 300 r.p.m. and that, on a trial, the speed attained was 10 knots. They add that the installation has been dealt with as for a full powered motorship and all Rule requirements, including pumping arrangements, have been complied with.

From a Report 8 made by the Philadelphia Surveyors, it is seen that the necessary number of watertight bulkheads to comply with the Rules for Motorships have been fitted.

IT IS SUBMITTED that the vessel is eligible to be classed as a full powered Motorship.

Details of the notation should be deferred, pending the receipt of a First-Entry Report on the Machinery, which the Philadelphia Surveyors should be requested to forward.
