

Lloyd's Register of Shipping.

342, Argyle Street, Glasgow.

ENCLOSURE.

7th June, 1923.

Dear Mr. Hill,

I am much obliged for your letter of the 6th instant, and note what you say in regard to the report on the refrigerating machinery and appliances of the steamer "FRANCONIA". I have spoken to the surveyor and he has put in an additional date of survey on 30th May when he saw the refrigerating machinery, and this will keep the matter in order. The report is returned herewith.

Would you kindly mention to the department concerned that the Builders would like to have the classification certificates as promptly as possible, as soon as advice is received from Liverpool that the steering gear is in order?

With kindest regards,

Yours faithfully,

J. L. Warlow.

J. F. Hill, Esq.,
