And
LONDON

Dear Sir

Replying to your communication dated the 23rd August last in connection with the S^t "Mirandella", I note the vessel has been classed; with regard to the chain cables, I have examined these as far as practicable but find it can only be properly done when they are ranged in drydock, not only because of the time involved but because some of the shackles etc., came into view with the apparent marks on the under side! I am, however, satisfied that these cables are the tested ones from the S^t "Luso" ex "Machico" & made up from the Brest marks & certificate No.

00279-00285 0181 2

18th Sept. 1927 (2) SS "Mirandella".

40470 - L.P.H.T. but submit further examination be made at next drydocking of the vessel to make certain; I have officially written to Owners on the subject.

I thank you for returning the old G.L. machinery classification book which has arrived safely.

With regard to the type of oil gland fitted to after end of stern tube, this is composed of vertical white metal bearing surfaces kept together by springs & encased by a jointed housing; the examination of tail shaft was made in May last. With reference to plans, Owners denied having the approved ones but after considerable search were found in their drawing office for their factories & I now enclose same.

I am, Dear Sir,
Yours faithfully,
Andrew Scott Esq.
Secretary
London.
