

S/S "EMPIRE ROCK"

Dimensions:- 425 x 56 x 37.8 moulded to Upper Deck.

This vessel, which was built under the supervision of the British Corporation, is a B type standard, the plans for which were approved jointly by Lloyd's Register and the British Corporation.

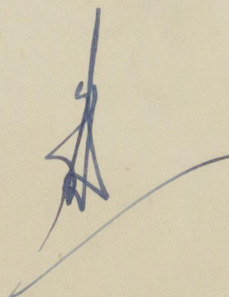

She has been purchased by Messrs. S. G. Embiricos, but the Special Survey is to be deferred until this becomes due next year. In the meantime the Hartlepool Surveyors are carrying out a General Examination as far as possible without opening up tanks or machinery. The Owners desire the freeboard to be changed to L.R. and new certificates issued.

Full instructions in regard to the re-assignment of freeboard have been communicated to the Hartlepool Surveyors by telephone and are being confirmed by letter. The plans of the sister ship were forwarded on Saturday.

It is submitted the Surveyors be informed that on completion of the Special Survey the class will be local with freeboard corresponding to an extreme draught of 26'9".
