GENERAL REMARKS (State quality of workmanship, opinions as to class, &c.)

These Vertical, exhaust gasfired, Donkey Boilers have been constructed under Special Survey in accordance with the Society's Rules and the approved plans and instructions thereto. The material used in the construction and the workmanship are of good quality. These Boilers have been tested under hydraulic pressure of 350 lbs. with satisfactory results. Under steam they were found tight and the safety valves have been adjusted to 200 lbs. pressure. In my opinion these boilers are eligible to be classed in the Society's Register Book with notation of:- "D.B. 200 lbs. pressure".

Distance of washers of safety valves:- for no lift.
 Port exhaust gasfired D.B. = 15.3 mm 20.9 mm
 Starb. exhaust gasfired D.B. = 12.1 mm 13.2 mm.

The approved plans of boilers are forwarded here with.
