# Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.3.

12th February, 1951.

Classn.

Dear Sir,

E  
EJB

T. S. M. T. "ATALANTA"

Mr. Gateley has handed in Rpts.8,9 and 4b, together with plans etc., in respect of the survey held on this vessel in January/August last, and has stated that the Electric First Entry Rpt.13 will be forwarded by you to him at Glasgow for transmission to this Office in due course.

I shall therefore be glad if you will expedite the dispatch of this report to Mr. Gateley for signature, as it is desired to place the case before the Committee as soon as possible.

Confirmation is also desired as to whether the thrust shaft size is 375 mm. diameter as reported, or 420 mm. as approved and I shall be glad if you will endeavour to obtain this information.

At the same time I shall be glad if you will forward test certificates covering all new electric generators and motors on essential services.

Yours faithfully,

Clerk to the  
Classification Committee.

W. H. Allen, Esq.,  
BREMEN.
