

m. v. "ASSIDUITY".

---

IT IS SUBMITTED the Glasgow Office should be advised that the fee charged by the London Surveyor for the survey during construction of the engines, as detailed at the foot of Report No. 95710, was based upon the nominal horse power as determined by the Rules in force when the engines were under construction.

It will be remembered that the new Rules for determining the NHP of heavy oil engines did not come into force until October last and the engines in question were under survey from April.

In the circumstances it is considered that the fees should be based upon the 71 NHP although the new formula rating of 154 NHP will be entered in the Register Book.
