The torsional vibration characteristics of the shafting installation of the main machinery have been examined in conjunction with the Engine Builders' calculations and due note has been taken of the information contained in your letter under reply concerning the elasticity of the motor and propeller.

In the circumstances, the torsional vibration characteristics will be approved for a service speed of 325 R.P.M.

One copy of each plan and one set of the Firm's calculation sheets are returned herewith.

In view of the urgency of this case, I confirm having telegraphed you to-day, as under, and the receipt of your First Entry Report on this engine is now awaited:-
