Particulars of Classification (which must be inserted precisely as in Register Book and Supplement)

Surveys must be reported in the terms of the Rules. The nature and extent of Examinations and Repairs (if any) must be stated in detail, the parts examined and their condition being clearly indicated. For Annual, Special or other Condition Surveys the Summary of Examination and Condition on the back of the Report is to be carefully completed and amplified if necessary in the body of the Report. Outstanding items to complete the Survey should be summarised at the end of the Report. The reasons for Repairs must be stated. Repairs on account of Damage (the alleged cause of which must be stated) should be separated from Repairs due to other causes, and, besides being detailed in the body of the Report, should be summarised in the form below. When, at a Special Survey, the Shell and Deck Plating is drilled the results must be reported on Report 8(Dr). Whenever Anchors or Chain Cables are replaced or retested the necessary particulars are to be given on Report 8(Eq) which is to be attached to this Report.

EXAMINATION AND REPAIRS AS PER RULE FOR DOCKING & TEMPORARY REPAIRS.

### TEMPORARY REPAIRS:-

Shell plate A6 (ssf) heavily grooved and fractured in way of two longitudinals in No.3 cargo tank (centre) now fitted with cement box covering affected area.

Shell plate E6 (psf) noted to be leaking at previously drilled test hole; welded plug punched out and steel tapered spike hammered to place and left tight.

NOTE:- This ship was docked and painted with the precise intention of proceeding to the "Laid Up" Anchorage where she will lie until sold for scrap. The survey was confined to examination of the hull only.

It is recommended that should the ship be re-commissioned shell plates A6(ssf) and E6 (psf) be examined and dealt with as found necessary before proceeding to sea.

SUMMARY OF DAMAGE REPAIRS	Shell Plates	Frames	R. Frames	Floors and Bracket Floors	Inner Bottom Plates	Deck Plates	Beams	Other Items
Renewed								
Removed and Faired or Repaired								
Faired or Repaired in place								

Was a Survey also held on machinery of the Ship? Yes

Is Classification Certificate required? If so, to be sent to No

When is the Report sent now, or when will it be sent? NOW

Has Interim Certificate been issued? Yes

### GENERAL OBSERVATIONS, OPINION AND RECOMMENDATION AS TO CLASS

State clearly what alteration, if any, is suggested to be made in the existing Classification or Survey or other records of the Ship in the Register Book consequent upon this survey; for example:—"to remain as Classed in the Register Book without fresh record of Docking"; "to remain as Classed and to have record of drydocking 1,55"; or "to remain as Classed and to have record of drydocking 1,55, and the notation of S.S. . . . 1,55".

This tanker so far as now seen is eligible in my opinion to remain as Classed with fresh record of Docking 2,61 subject to shell plates A6 (ssf) (fractured) and E6 (psf) (holed) being examined and dealt with as found necessary before the ship proceeds to sea should she be re-commissioned.
