

Refrigerating Machinery for Gotaverken's No.476. RMC 47683

It is submitted the Surveyors be again requested to state the ice melting capacity in accordance with the evaporator and condenser temperatures, as laid down on page 159 of the Rules.

It should be pointed out to the Surveyors that in the case of the largest insulated vessel recorded in Vol 17 of the Register Book the ice melting capacity does not approach the figure of 2160 tons given in their letter of the 16th instant.
