proposal: Due to remote area of operations of this vessel
in the Western Arctic, it is impracticable to
bring her to Vancouver more frequently than at
four year intervals, although it is stated that
annual inspection afloat is made by the Canadian
Government Inspector at Tuktuk. The Owners,
therefore, state that the next drydocking survey
is likely to take place in Vancouver during
validation June, 1962 (4 years after last drydocking).

"5.5 Ver 58 assigned"

Submitted Owners' proposal for next d. dock
in 1962 be approved in this instance provided
a copy of the Canadian Government Inspector's
report is furnished and the ship found by him
in satisfactory condition.
