

'FRAVARTA'

Before this case can receive consideration the Surveyor should be referred to his letter of 28.3.49 requesting that his First Entry Report No. 1403 be destroyed and stating that a new report was being prepared.

In view of no new First Entry Report having been received with his Rpt. 8 No. 1440 recommending classification he should state whether his original First Entry Report remains valid or if this is not so he should forward a new First Entry Report without delay.
