The condition of any of the following items is to be described as "good" only when the part has been examined, found or placed in good condition, and is considered to be acceptable until the due date of the next Periodical Examination. Where it is considered that re-examination or repairs should be effected before the due date of the next Periodical Examination a distinguishing mark thus † should be inserted against the item and the circumstances and action recommended described fully under "defects and repairs". At part or complete Special Surveys those items which are not applicable to the ship should be cancelled with a black line; this need not be done when the machinery is on a continuous survey basis. When any part has been subjected to pressure test this should be stated. Engine parts when referred to by numbers should be counted from forward.

OPINION OF MACHINERY AND RECOMMENDATIONS The machinery of this ship as now seen is eligible in

opinion to remain as classed without fresh record subject to Starbd. M.E. No. 4 cylinder cover

being re-examined by 2-59 (6 months) and to any other outstanding conditions of class being

dealt with as previously recommended.
