"Peterson."

Phl. 4980.

This vessel was built in 1920 by the Baltimore Dock & Shipbuilding Company, not under way.

The original double reduction geared turbines now been removed & a set of triple expansion reciprocating engines fitted. These engines built in 1923 under the Survey of the American Bureau of Shipping & have not hitherto been in use. With a view to classification the engines & Boilers been examined throughout & satisfactorily reported upon.

It is submitted that this vessel is eligible for THE RECORD.
