Re. s.s. "Julian Presa" - Boiler Inspection.

I have received a letter from these Owners instructing to inform you when this vessel is again in the Bristol Channel that you can attend to the above.

I am informed that this inspection takes place when boilers are fired and sufficient pressure on to enable your Surveyor check safety valves etc.

Vessel is actually loading Pitwood at Lisbon for Bristol Channel and after discharge she loads coal out again to Lisbon. She should sail from Lisbon on 4th inst., being available from 14/17th inst.

I have requested my Agents, Messrs Lambert Brothers Ltd., Exchange, Cardiff who will attend to consignment of vessel, to inform your Cardiff Office when they consider she will be ready.

With compliments.

Yours faithfully,

*James Macdonald Kirk*

U.K. Agent for Owners.
