

"CONTE GRANDE".

Messrs. Stablimento Tecnico Triestino No.764.

Refrigerating Installation.

The Surveyors at Genoa state they have been asked by Messrs. Eugenio Massa of Genoa to examine two Hall Type 10A machines which it is proposed to instal in this vessel.

They mention that the machines had the makers numbers 5185 and 5189 and were originally intended for the vessels "DUCHESSA D'AOSTA" and "ROSANDRA" built at Trieste about 1920, that the machines appear to be in practically new condition and it appears possible that neither machine has ever been used.

IT IS SUBMITTED that the Surveyors might be authorised to examine the machines in question and, if required, issue a certificate on Form Report 10, upon satisfactory completion of the survey. The only test required would be a trial of the machines under working conditions.

The Surveyors should also be advised that there is no record of these machines having been constructed under special survey.
