

4E

is subject to the low~~er~~ sea suction valve being renewed at the next drydocking.

ed by Chief Engineer Surveyor.....

Received from Chief Engineer Surveyor.....

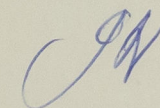

2- AUG 1960

P'S NAME....."THELIDOMUS".....REPORT.....Cff.61168.....No.....

Docking. The surveyor states that as the

vessel is to be laid up the Owners do not wish to deal with the Special Reasons List item at this time. The valve was opened up, examined internally and found satisfactory, and in view of the sound condition of the substantial cement box around the chest, the Surveyor recommends that the class now be made subject to the low sea injection valve being renewed before the vessel resumes service.

IT IS SUBMITTED that this vessel is eligible to remain as classed subject as above as now amended.
