Dear Sir,

T.2 Tanker "THELIDOMUS".

This vessel is now undergoing strapping etc. at this port and the Anglo Saxon Petroleum Co. are proposing to depart somewhat from the plan issued in London, in regard to the compensation etc. to be fitted in way of tripping brackets and local fractures in the tanks. They also propose in certain parts to scallop out the longitudinals at the transverse bulkhead ~~thess~~

They state that their plan of alterations has received the sanction of the London Office and we should be glad to have this confirmed and a copy of any such approved plan.

Yours faithfully,

TRANSMITTED TO LONDON FOR
THE CONSIDERATION OF THE COMMITTEE

The Secretary,

LIVERPOOL.
