ence

ar Sir,

T.S.S. "ISLE OF GUERNSEY".

In reply to your letter of the 4th ultimo, we now have to inform you that the Section Box "U" and Section Box "W" are one and the same, and circuit UL is actually the 6 Kw toaster shown in section box W on our report.

Section Box "U" supplies:-

- | | | | |
|-------------------------|-------|------|--------|
| 1. 6KW Toaster. 7.064 | 54.00 | amps | LCVIR. |
| 2. 1 HP Refrig. 7.036 | 5.00 | " | -do- |
| 3. 1/3 HP Refrig. 7.036 | 2.00 | " | -do- |
| 4. 2/3 HP Refrig. 7.036 | 2.00 | " | -do- |

the item "Section Box W" should be deleted from our report.

With regard to the 6Kw toaster, the 7.064 shown on our report is as stated. The Owners Electrical Superintendent states there are three operating positives for the toaster, viz, high, medium or low, and that usually operates on medium or low, also that the toaster is only operated for very short periods, and that possibly a diversity factor would be applicable.

We are, Dear Sir,
Yours faithfully,

Robert W. Stonehouse pro. The Surveyors

Secretary, LONDON.
