

S. S. Thine Woppen

It is submitted that the Surveyor should be referred to the Rules regarding the size of the screw shaft & he should be requested to explain how he obtained the dia of the screw shaft, required by the Rule, mentioned on his Report, in view of the fact that the dia. of propeller has to be taken into consideration & that shafts not strengthened by having a continuous liners (whether fitted with Codewall's patent or not) require to be  $\frac{21}{20}$  larger in dia.
