6th February, 1959.

Dear Sirs,

lassn.(S)

Motorship "EKATERINI ALEXANDRA"

PMW/SJL

With reference to your letter of the 20th December, I have to inform you that the report of this vessel's survey at Piraeus has now received consideration in this Office.

The defective tubes in the port donkey boiler were renewed at this time and the condition of class in respect of this item has now been deleted.

Accordingly a fresh record of Donkey Boiler Survey 6.58 has been assigned.

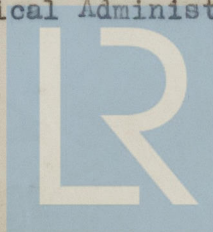

The port main engine Nos 2 and 6 cylinder covers were also examined and although these items were found to continue efficient it is recommended that they should be re-examined by the end of January, 1960.

The Committee have continued the class subject to this matter receiving attention by that time.

Yours faithfully,

Assistant Clerk to the  
Classification Committee.

The Maritime Technical Administration Ltd.,  
St. Clare House,  
30-33 Minories,  
LONDON E.C.3.
