QUESTION.

ANSWER.

I shall be glad to learn what arrangements are proposed to complete the Donkey Boiler Survey which became due in July last and was partly held at Copenhagen in May. To complete this survey the safety valves in both boilers require to be adjusted and the oil fuel and steam smothering arrangements examined.

Date:— 26th January, 1954.

The owners state this ship has been dry docked at Hong Kong now and they trust the Donkey Boiler survey was completed at the same time.
