SHIP'S NAME

Before this case receives consideration the Surveyor should be requested to state whether the auxiliary steam pipes above 3" bore if, fitted, were examined and found satisfactory, also as the survey is incomplete pending the saturated steam pipes in the cylindrical boiler smoke boxes being dealt with. An amended interim certificate should be issued.

REPORT Nap.

No. 74

Before this case receives consideration the Surveyor should be requested to state whether the auxiliary steam pipes above 2" diameter were examined and found satisfactory, also as the survey is incomplete pending the satisfactory repair of the cylinder liner smoke boxes being dealt with. An amended interim certificate should be issued.
