

Empire Plover
(ex Janelew)

Janelew fees

NH. 5341

On the American scale the fees for the survey of the
Engines, Boilers & Screw shaft amount to \$615.

The reports do not give the Kilowatts of the dynamos
on which the fees for the survey of the electrical
equipment are based but ^{on} a similar vessel the
Fresno, there are 3 dynamos of a total of 29 KW
& it is probable that the installation in the "Janelew"
is similar. On that basis the electrical survey fee
is \$90, making a total of \$705 or \$176.57
it is submitted that ~~the~~ amount be charged now.
