25th October, 1960.

Dear Sirs,

"ARGO DELOS".

The ship has been under survey at this port for adjustment of the safety valves of the port and starboard donkey boilers.

The Owners' Superintendent stated that these boilers had been surveyed at your port. Will you kindly confirm this and let me know if the adjustment of the safety valves completes the inspection. Please also state the date recommended and if the full fee has been charged.

An early reply to this enquiry will be appreciated.

Yours faithfully,

Secretary to the  
Scottish Committee.

The Surveyors,  
ROTTERDAM.
