Steampipe Survey overdue (if any over 3" bore).

Outstanding items  
if partly held

Hull subject:- See endorsement 10.5.61.

Propositions  
already agreed

In May last it was stated that the Continuous Survey cycle would be completed before October, 1961. In July/August the Owners stated that the ship had been sold to Japanese buyers for breaking up and would leave their service at the end of the current voyage.

New proposal

The New Owners state that the ship will be delivered to them at the beginning of next week and will sail for Japan from Liverpool via Casablanca, at which port cargo will be loaded for discharge at 3 Japanese ports. The ship is expected to arrive at Osaka at the end of December, 1961. The Owners state that they have no intention of using the ship for transportation purposes after arrival at Osaka and discharge of cargo, but an extension of classification for 3 months after the expiration of the Leadline Certificate until the end of February next is desired (2 months after the expiration of the year of grace). The ship is 30 years old.
