GLASGOW REPORT No. 51220

Port GLASGOW,

9th February, 1931.

This is to Certify that

G.O. COMMON

the undersigned Surveyor to this Society did at the request of Messrs. The Fairfield S.B. & M. Co., Ltd. of Glasgow, attend at their Works on the 24th April, 1930 and subsequently for the purpose of examining and testing three Air Receivers intended for their Motor Vessel No. 640.

These Air Receivers are stated to have been built to Admiralty specification and the materials tested in accordance with their requirements.

The dimensions of the Receivers have been checked and found to be in accordance with the requirements of this Society for a working pressure of 600 lbs. per sq. inch. Their condition and workmanship, as far as can be seen, are good and sound.

They have been tested in the presence of the undersigned by hydraulic pressure to 1,000 lbs. per sq. inch and showed no signs of weakness and were tight and sound in every respect at that pressure.

Working pressure not to exceed six hundred pounds per sq. inch.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—  
While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for accuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other document of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society."

For the purpose of identification the Receivers have been stamped thus:-
