If fitted with an outside gland of } Yes.  
approved type }

This vessel's machinery appears to have been built in accordance with the Rules and the approved plans, and it is submitted she is eligible to be classed ~~RLMC~~ 2,40

=====

The Hull Surveyors should be requested to ascertain from the Builders where the air receivers were made, and then obtain from the Surveyors concerned the necessary particulars required for the First Entry Report or arrange for a copy of the certificates to be forwarded to this Office. X

The Owners should be asked to obtain the Makers' test certificates for the two dynamos and the steering motor.

As the auxiliary oil engines do not appear to have been constructed under special survey, the London Surveyors should be requested to ascertain from Messrs. Newbury Diesel Co., Ltd., whether their engines Nos. 727 and 728 as fitted in the m.v. "ALACRITY" (The Goole Shipbuilding & Repairing Co.'s Yard No. 347) are duplicates of their engines Nos. 3900E and 4151C, Contract No. 720 as fitted in the m.v. "SPIRALITY" (The Goole S.B. & R. Co., Yard No. 346).

The London Surveyors should also be informed that it is intended to place the electrical spare gear on board at Greenhithe.
