

15a

Steel Screw Steamer "MATHURA"; 9743 tons gross; Built at Glasgow by Messrs.C.Connell & Co.Ltd.

Owners: T. & J.Brocklebank, Ltd., Liverpool.

-----  
This vessel was commenced in January, 1919 and launched on the 18th May, 1920, and in accordance with the Rules the date of build would be recorded as November, 1920, i.e.- at a period of six months from the date of launch.

The Builders point out, however, that owing to the moulders' and joiners' strike the turbines were not ready to be placed on board, and on this account and other labour troubles, which delayed the completion of the vessel, they will be pleased if the Committee will assign the date of build as December, 1920.

The First Entry reports on the vessel were submitted to the Glasgow Committee on the 5th instant, when the vessel was classed 100A1, and the request of the Builders for one month's extension of the date of build was recommended for the favourable consideration of the General Committee.

6th January, 1921.
