Enclosure

13th April, 1960.

Classn (S)
AH/BS

Dear Sirs,

Motorship "TARIA"

The Society's Surveyors at Singapore have reported that this ship was under survey in January last when the shell and deck plating was drill tested.

Particulars of the results of the drilling of the shell and deck plating are shown on the Singapore Harbour Board's drawing No. R/1460, a copy of which is enclosed.

An examination has been made of the drill results of the upper deck and shell plating over the cargo tank length and renewals will be necessary, as shown in red on the above mentioned drawing, on the occasion of the Special Survey in November, 1960, it being assumed that the drillings are representative of the general condition of the plating. *Dec.*

Recommendations for renewal of plating outside the cargo tank length and any amendments to the renewals indicated at present that may be necessary will be made by the Society's Surveyors on the occasion of the Special Survey.

Yours faithfully,

 Deputy Clerk to the
Classification Committee.

Messrs. Shell Tankers Ltd.,
Ibex House,
Minories,
London E.C.3.
