FREEBOARD REPORT on the

"Henning Maersk"

Mr A. P. Moller of Copenhagen the owner of this vessel phoned the undersigned at this office last night and again to-day (Ronal 5640) regarding proposals for new tankers. He requested information regarding the fitting of a stream-lined deck house in line of the present bridge on the above named ship. He was advised of the increased freeboard and told this could be obtained by increasing the present shears which were below standard. Having discussed the matter over the phone Mr Moller expressed his thanks for the information supplied.
