

"PONTOS" and "PELIKAN"

Messrs. W.E.Watson Ltd., have been communicated with and informed that Mr. McNeil, of the Ministry of Transport, has stated that classification is not required for these vessels in the meantime, and that they should be examined with a view to a record of "Examined L.R."

It was pointed out to Mr. Watson that this did not agree with his letter of the 18th May, and that the Society's Surveyors would be informed of any action required when the details were settled between himself and the Ministry.
