

Ship's name ~~is~~ HUSEYIN KAPTAN

Port Ishtant

Letter of 18/11/62

No.

Last survey date

Class is subject to: -

Forward boiler W.P. not to exceed 150 lbs/sq. and boiler being used for aux. steam line only until all plain plates (underside) are renewed in original gauge thickness.

Submitted record of MBS 5/62 be not assigned, subject as above.

It is included but the survey ^{was} 14/11/62 should confirm that the forward boiler safety-values are adjusted to 150 lbs. per sq. in. ^{per} as the condition of class.

~~He should also confirm that the superheater elements, and hangers and steam line have removed or blocked off~~

Note for R.B.

Re boilers delete "spl" & amend

to "2 SB 220 lbs."

91 SB(F) boiler 150 lbs. ^{was}
