

M.V. "IRLAND"

With reference to machinery endorsement of 13th instant, wherein it was recommended that the following information be made in the Register Book viz: "E made 1943, fitted 1950", it should be noted that these engines were wholly constructed under the supervision of the Society's Surveyors prior to and during the early days of the war, and that they have since been in store.

The engines have now been satisfactorily installed and the usual trials under working conditions carried out.

*at* In the circumstances, IT IS SUBMITTED for consideration ~~whether~~ the record of LMC 12.50 could be made without any reference to a date of build.
