

M.S. "KING ALFRED"

Classification of machinery.

Vessel built under B.C. Survey.

The survey for classification of the hull was completed in 7,47.

The Classification Survey of the machinery is being carried out on a C.S. basis, and certain parts had already been examined by the B.C. Surveyors before classification with this Society was desired.

The items thus seen were accepted as part of the cycle with re-examination due within 4 years of their respective dates.

The record of LMC(CS) with date has been withheld in accordance with present practice until all parts of the machinery have been examined by this Society's Surveyors.

The first cycle including those parts examined by the B.C. Surveyors was completed in 11,48, and if all items had been examined by the Society's Surveyors a record of LMC(CS) 11,48 could have been assigned.
10,44

It is submitted for consideration that in view of merger of the two Societies the above records should now be assigned and the Owners advised of the items which have not been examined during the last 4 years.
