

"H A V B R A U T"

When the Notation of Rest. #5A - from 12,52, "For Fishing purposes also for the carriage of light cargoes" was assigned in January of 1953, the equipment approved (see memo dated 19.12.52) consisted of 2 bower anchors and 1 stream anchor, also 120 fathoms of 14/16" diameter chain cable with the renewal diameter of 25/32".

The Surveyors report 150 fathoms of chain cable on board, 45 fathoms of which are worn to below 27/32".

The Surveyors should be requested

- 1) to forward the mean diameter of each individual length of chain cable recommended to be renewed,
- 2) to inform the Owner that only 15 fathoms require to be renewed, provided the remaining 30 fathoms of chain cable ~~is~~ removed from the ship.

ARE

Replies to the above are required before this case receives the consideration of the Committee.

ABM,
19.7.62.
