

**COPY**

3rd September, 1946.

/KR.

Dear Sirs,

I duly received your letter of the 27th ultimo intimating that you have decided to convert the steam trawler "CEDAR" from coal to oil fuel, and I have already placed myself in communication with the Newcastle Surveyors with a view to the plans of the proposed alterations being submitted to this Office for approval.

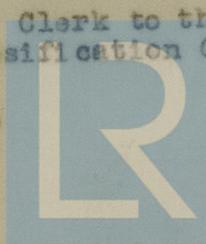

Your further remarks regarding the other trawlers under similar conversion are also noted.

As regards your request that consideration may be given to the insertion in the Register Book of some record of the conversions, this will be dealt with when the reports are received, but in any case the vessels will be granted an appropriate notation of the conversion to oil fuel which will bear the date of the change over.

Yours faithfully

Clerk to the  
Classification Committee.

The Lago Steam Trawler Co. Ltd.,  
Wyre Docks,  
Fleetwood,  
Lancs.
