

MEMO TO SHIP REPORTS

STANVAC NAIROBI

The results of the drillings made at Hong Kong have now been received and agree with those handed in by the Owners and dealt with in endorsement dated 8/1/62.

When the above drillings were taken at Hong Kong in November 1961 a general examination was also carried out for postponement of the special survey (due 9,61) until September 1962.

The ship is now almost five months into her year of grace and it is considered, in view of the deterioration on the deck (23%) and bottom shell (14%) the owner should be strongly recommended to carry out the special survey at the earliest possible opportunity.
